

How to digitize video cassettes

For Mac

1. Begin by double clicking the **Elgato** icon on the desktop. (Fig. 1)
2. Name your video and type in its length. If you are not sure of the length choose a time that you know is longer than the video. (Fig. 2)
3. Insert your video into the VCR and hit **Continue**. (Fig. 3)
4. Be sure your video is playing. You should see it in the window on the computer. Hit **Continue**. (Fig. 4)
5. Hit record to record your video. Don't hesitate to rewind if necessary to start it at the spot you like. When you are finished hit **Stop Recording**. (Fig. 5)
6. You will find your video on the Desktop in the **Work in Progress** folder.. (Fig. 6)
7. Transfer your digitized video from the **Work in Progress** folder to your personal storage device..
